JAYESH MALAM

OBJECTIVE

As a dedicated and enthusiastic fresher with a strong foundation in the MERN stack (MongoDB, Express.js, React.js, and Node.js), I am eager to leverage my technical skills and passion for web development to contribute to a dynamic development team. My goal is to develop innovative and efficient web applications while continuously growing and advancing my skills in a collaborative and fast-paced environment.

Graduation Complete with 83% (BCA)

12th in Commerce Department

12th Completed with 76% (2021)

10th

10th Completed with 73% (2019)

PROJECT DETAILS

Digital E-gram

The objective of the Digital E-Gram website project is to create an accessible and user-friendly digital platform that enables village residents to efficiently access and utilize various local services, stay informed about community announcements, and find essential resources. By digitizing these services, the project aims to enhance community engagement, streamline service requests, and improve communication between residents and local authorities, ultimately contributing to better local governance and quality of life for the villagers.

Using By-

Frontend:- HTML,CSS,JS, BOOTSTRAP

Backend:- PHP, MYSQL
